- ✗ Dents in cases

Grade 3: 25% or less of core exchange value*

Built from non matching parts
Corrosion has removed plating and damaged surface
Non standard hardware
Missing parts
Paint hiding heavy pitting
Dented cases

Core Unit Standards & Valuation

We only accept **Grade 1 core units** for exchange against our restored ignition assemblies.

If your core does not meet this standard, please contact us first. We will assess its condition and advise you of the **maximum value** it qualifies for under our grading guide.

We also purchase failed ignition units, however the rates offered for outright purchase are not the same as the core values applied when exchanging against a restored unit.

*Core value as advertised on the product sales description
